

Acadia University - Railings and Balustrades

Location Wolfville, Nova Scotia
Designer / Architect Robert A.M. Stern Architects
Duration Jun 2001 - Jul 2002

Scope - SML was contracted to fabricate and install approximately (450) lineal feet of decorative guard-rails on exterior limestone terraces, as well as a multi-story spiral balustrade and handrails for interior stairs.

Highlights - Exterior railings were fabricated from a combination of hot and cold-rolled steel, galvanized, then painted. Interior railings were heat-darkened, and coated with a clear oil finish.
