

Concord Adex Developments - Drivecourt Iceberg Sculpture

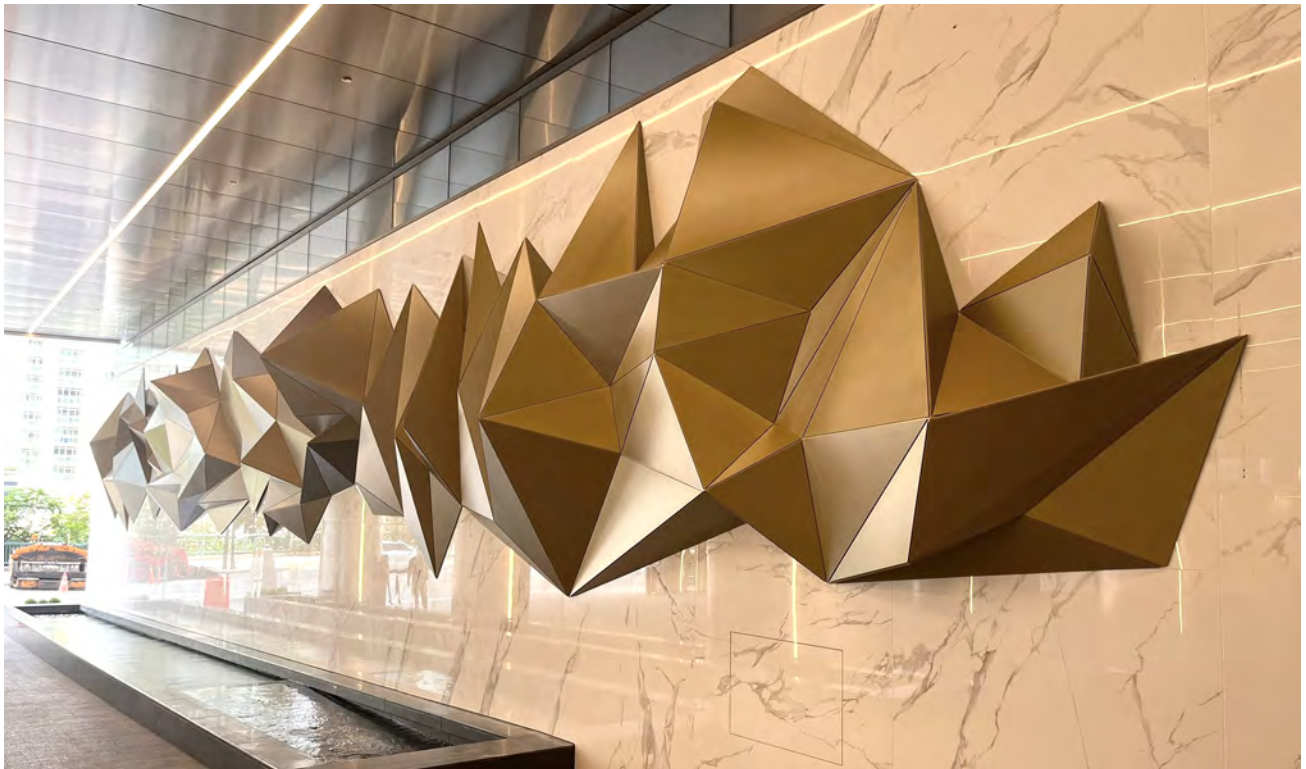

Location Toronto, Ontario
Designer/Architect Douglas Coupland
Duration Nov 2020 - Jul 2025

Scope - Soheil Mosun Limited was commissioned to manufacture design, supply and install this custom public art installation. Made from fabricated painted aluminum, this polygonal sculpture titled "Iceberg" is located at 1A Blue Jays way in Toronto.

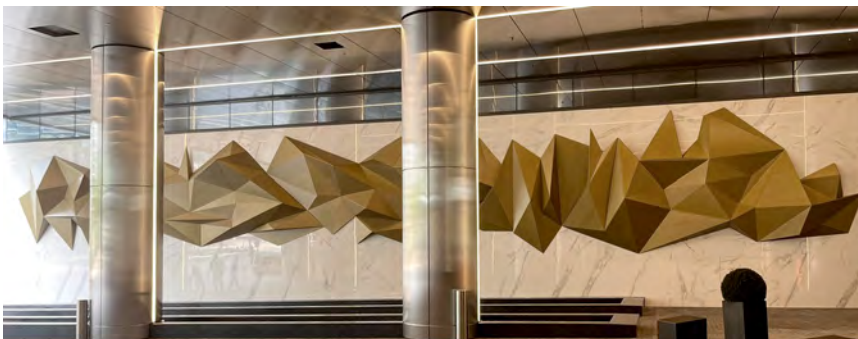

Highlights - Sculpture is approximately 81' in length and 11' high at it's highest point and is 3.5' deep. It is made of 1/8" thick aluminum plate, painted gold and the sculpture consists of multiple polygonal panels mounted to one continuous welded aluminum framework. The polygonal panels are mounted from the inside of the welded framework, which allows for all surfaces to be flat and without any hardware showing at the exterior.
